PHYSICS 102
IMAGE IDENTIFICATION

Purpose: To practice interpreting images from other planets.

For each of the following images answer these questions:
(a) For each letter marked on the image, what is the surface feature indicated?
(b) How can you tell what features these are?
(c) What geologic surface processes formed them?
(d) What planet do you think this might be and why?
(e) In what order (oldest to youngest) were the features formed (if more than one) and why?
